Lupin Sahu

Full Stack Web Developer

PROFESSIONAL SUMMARY

Dynamic full stack web developer with expertise in the MERN stack, specializing in crafting seamless, scalable web applications. Adept at using Generative AI for innovative solutions, coupled with a proactive approach to learning new technologies swiftly. Strong problem-solving and collaboration skills in team settings.

PROJECTS

1. Quantum Visionaries |

JavaScript | CSS3 | Responsive Web Design | Git

- Developed an interactive whiteboard using JavaScript, CSS3, and HTML, demonstrating responsive web design capabilities across various devices.
- Implemented drawing tools, including adjustable colors and stroke sizes, showcasing proficiency in front-end development.
- Contributed to login and sign-up functionalities and applied advanced CSS to enhance visual appeal.
- Incorporated undo/redo features and save functionality, emphasizing user experience and usability.
- Worked as part of a team, highlighting collaborative skills and experience with Git for version control.

2. Social Media Analytical Website |

CSS3 | HTML5 | JavaScript | Responsive Web Design

- Built a social media analytics app tracking performance metrics and trends, improving online presence and user engagement.
- Designed and implemented a responsive settings page using JavaScript, HTML5, and CSS3, optimized for various devices.
- Analyzed user behaviors to provide actionable insights, showcasing the ability to leverage data for enhanced user experience.
- Styled components using CSS to create visually appealing interfaces, showcasing attention to design detail.
- Collaborated in a team environment, demonstrating medium-level contribution and familiarity with collaborative workflows.
